23X CHIPARVESTOR® WHOLE TREE DISC CHIPPER

Morbark 23X Chiparvestor® whole tree chippers are built to last. The improved chipper hood design allows for better access to the disc during inspections and maintenance. Like the previous Model 23 Chiparvestors, the 23X uses a 75" (190.5 cm) diameter x 5" (12.7 cm) thick chipper disc to chip large volumes of wood, while the built-in dirt separator with deflector keeps the end product clean.

FEATURES AND BENEFITS

- The Morbark Integrated Control Systems (MICS) monitors pressures, temperatures, clutch systems and engine efficiency to maximize performance.
- Each disc is fabricated from plate steel and put through ultrasonic testing. Material certification is issued for each disc, which provides the best chipper disc in the industry.
- Large work platform makes for easier and safer disc inspections and maintenance.
- Compact, 8'4" (2.54 m) width makes this machine is easy to transport anywhere in the world.
